HELPING TODAY'S
HOME BUILDERS

Get their Money's Worth
WITH THE

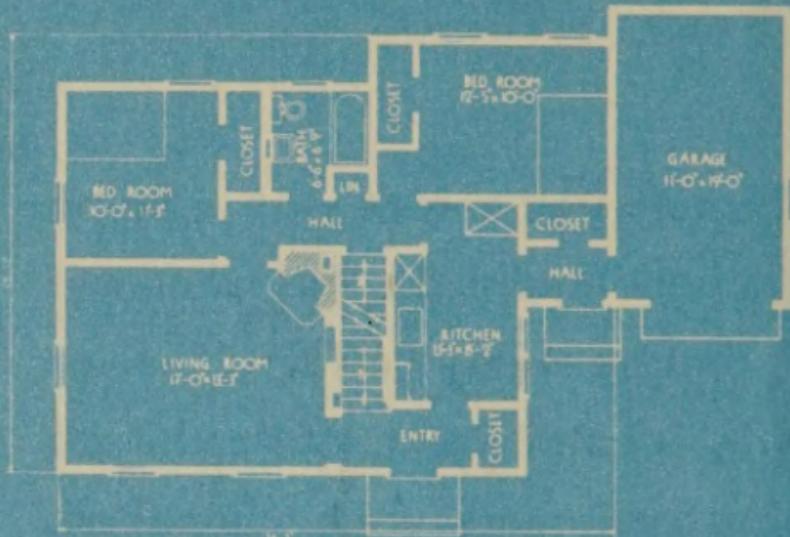

WEYERHAEUSER 4-SQUARE
HOME BUILDING SERVICE

Building the family home is the most important family enterprise. It is a major project, for it establishes the background of family life and its place in the community.

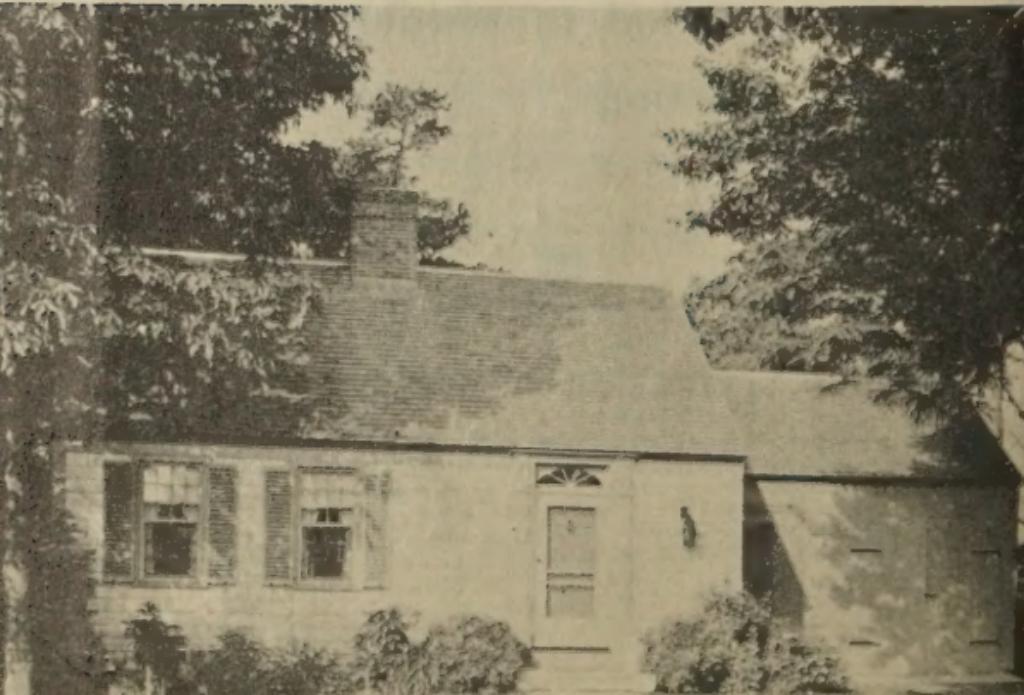

The home involves about the biggest single investment a family will make. For that investment, every American family is entitled to a home that satisfies definite requirements. It must be a Truly Modern Home.

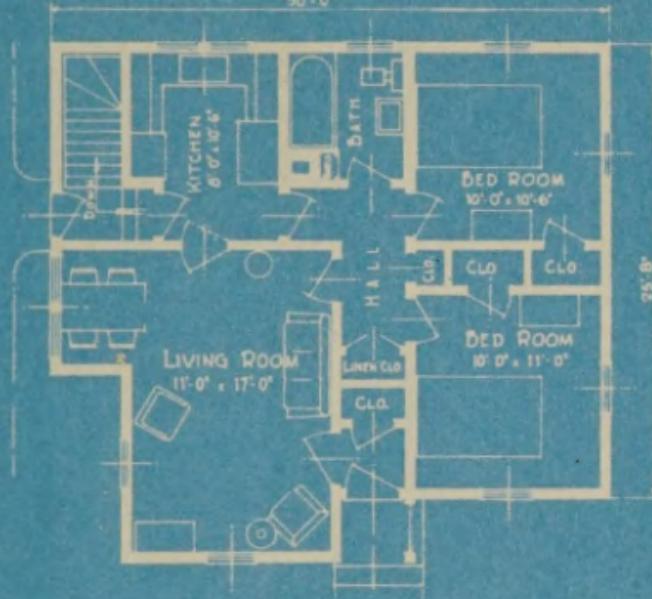

Home building is a fascinating adventure in which careful planning for features of enduring worth will yield rich demands in a sound, durable, beautiful home of complete convenience and lasting satisfaction.

To help you secure such a home for your family, the Weyerhaeuser 4-Square Home Building Service was created. Prominent architects and engineers were consulted. Specialists in heating, ventilating, lighting and plumbing conferred with home economists and manufacturers of equipment needed in the modern home. All contributed the benefits of their experience and knowledge toward making the homes in this Service ideally suited to modern, economical living.

**"This Planning Guide
Gives Professional Pointers
To Home Builders"**

Lumber is our best and most economical building material. Nevertheless, the research and technical divisions of Weyerhaeuser are constantly seeking new ways of stepping up lumber performance. Their contributions are doing much toward helping America to secure ever-finer, more serviceable modern structures. The Home Building Service is one example.
